

EZ ROLL™ GRASS PAVERS PRODUCT CATALOG

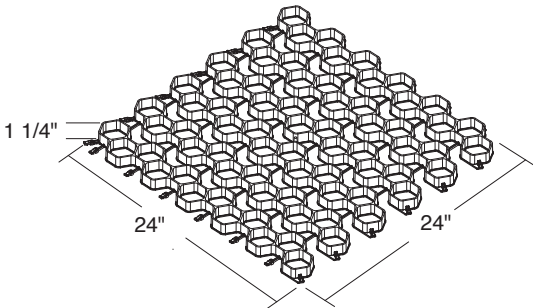

EZ Roll™ Grass Pavers are plastic grass paver that allows light to heavy vehicular traffic to drive over turf areas. They prevents soil compaction, allowing healthy root growth where grass can thrive. The pavers are used to stabilize soil and allows turf to grow in areas that would traditionally have impervious hardscaping installed.

EZ Roll™ Grass Pavers can be used as a BMP for NPDES Phase II compliance. This engineer-designed grass paver comes in pre-assembled rolls for easy installation.

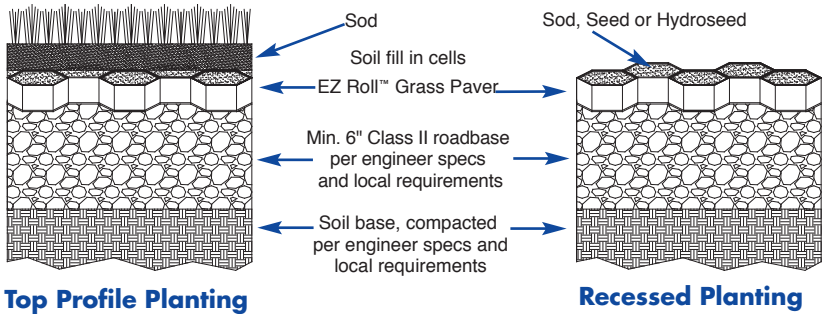

Specifications: EZ Roll™ Grass Pavers are honeycombed rolled grass paver that are comprised of 24" x 24" panels. The product is made of up to 100% recycled polyolefin material with UV inhibitors. Panels are available in pre-assembled rolls, and multiple panels and rolls easily connect together with a series of female to male locking joints. Paver must have an ultimate compression load rating of 57,900 psf "empty."

Part No.	Description	Color	Pkg. Qty.	Wt. Ea. (lbs.)	Product Class
